

Measuring - Time

W

Use everyday language related to time 'before' 'after', 'later', 'yesterday' 'tomorrow'.

Level 1

Use the vocabulary of time including the days of the week.

Order everyday events and describe the sequence.

Order and sequence familiar events and measure short periods of time.

Say and order days of the week.

Say and order months of the year.

Read the time to the hour.

Level 2

Read the time to the hour and half hour.

Know that 1 hour is the same as 60 minutes.

Use units of time (seconds, minutes, hours, days) and know the relationships between them.

Read the time to the quarter hour.

Identify time intervals, including those that cross the hour.

Level 3

Read the time to the nearest 5 minutes on an analogue clock.

Use am, pm and 12-hour clock notation.

Read the time on a 12-hour digital clock.

Calculate time intervals and find start or end times for a given time interval.

Read time to the nearest minute.

Choose units of time to measure time intervals. (hours, minutes, seconds)

Calculate time intervals from clocks and timetables written in 12 hour clock notation.

Use a calendar to calculate time intervals. E.g. Use a calendar to work out how many days and weeks it is until my birthday.

Level 4

Know 24 hour clock notation.

Convert 24 hours clock notation to 12 hour clock notation and vice versa.

Solve problems using a timetable written in 24-hour clock notation.

Level 5

Recognise that there are different times around the world.
